AIRCRAFT ASSET
MANAGEMENT

EXTRACT TRUE VALUE FROM YOUR RECORDS USING OUR DIGITAL SOLUTION

ABOUT AIRCRAFT ASSET MANAGEMENT

The world of commercial aviation has undergone a significant transformation through its entry into the 'digital age'. While digitization has improved efficiencies in every aspect of commercial aviation-related operations, it has also generated a by-product that has proven to be of exceptional value. That by-product is data. However, to be of true value in aircraft asset management, that data needs to be both accurately and efficiently obtained and, of even greater importance, it needs to be 'understood'.

Today, effective aircraft asset management has become a 'data-driven' process, and here at AAM we understand this more than most. As a result, through the creation of a highly experienced team of professionals, we have developed innovative, complete, and cost-effective solutions for the numerous challenges faced in the area of aircraft asset management, whether for an aircraft or an engine. Put simply, at AAM we have a multidisciplinary team of highly respected, knowledgeable, and appropriately licensed consultants who can help you with every aspect of aircraft asset management from initial acquisition through to final disposition.

MESSAGE FROM CEO

Being an Aeronautical Engineer is truly satisfying, and also a privilege. One works hard to become highly skilled, to become knowledgeable, and to one day pass on years of accumulated knowledge and technical expertise to customers and the next generation of passionate students. As a true advocate for paperless digital sustainability, I am now spearheading the next generation of a lifecycle digital records platform to support our commercial aviation industry customers' digital transformation. Together with our consultants, we are redefining commercial aviation through our combined expertise by creating and providing future-proof and cost-effective digital solutions.

GORDON J.
CEO AAM

TEARDOWN SERVICES

Our company offers specialized Project Management Services for aviation teardown operations, ensuring seamless execution and maximized value extraction. With an on-site presence throughout the project, we oversee the meticulous teardown of diverse components, including engines, avionics equipment, and high-value parts. Our expertise encompasses tracking documentation, status monitoring of harvested components, and coordinating daily production meetings.

Furthermore, we excel in offsite record management, meticulously curating labels for shipped parts. Leveraging comprehensive airframe and engine procurement management, we optimize lead times, costs, and component value. Our tailored approach guarantees efficient teardowns and strategic market offers for optimized returns.

TAKEOFF AS A CONSULTANT

At AAM, we're not just a company; we're a passionate community of aviation enthusiasts, strategic thinkers, and industry experts. As a consultant with us, you'll be at the forefront of shaping the future of aviation. Your expertise and insights will play a vital role in guiding airlines, lessors, and aviation organizations to greater success.

Why choose AAM?

Cutting-edge Opportunities: Experience the thrill of working on innovative projects that are transforming the aviation landscape.

Collaborative Environment: Join a dynamic team of like-minded professionals who share your passion and drive for excellence.

Unlimited Growth: AAM is committed to your professional development. We provide the tools, training, and mentorship you need to thrive.

Global Impact: Your contributions will resonate across the world, influencing the way aviation operates and evolves.

Minimum Qualifications to Apply

Aircraft Maintenance License (AML): Hold a valid FAA or EASA AML, showcasing your dedication to excellence in the aviation field.

5+ Years of Consultant Experience in Aircraft Leasing: Bring your substantial expertise to the table with a minimum of five years of hands-on experience in aircraft leasing consultancy.

If you're ready to spread your wings and make a significant impact, AAM is the place for you. Buckle up and set your career on an exhilarating course by becoming an integral part of our consulting team.

**AIRCRAFT ASSET
MANAGEMENT**

WORKING GROUP

Whether you are an airline CEO, a lessor, financier, or technician, by joining our Working Group you will become part of a collaborative assembly of the best people from every field of the aviation industry, all working together to help create the ultimate, all-encompassing commercial aviation platform that will meet yours and everyone else's individual needs.
