AIRCRAFT ASSET
MANAGEMENT

EXTRACT TRUE **VALUE** FROM
YOUR **RECORDS** USING OUR
DIGITAL SOLUTION.

ABOUT **AIRCRAFT ASSET MANAGEMENT**

The world of commercial aviation has undergone a significant transformation through its entry into the 'digital age.' While digitization has improved efficiencies in every aspect of commercial aviation-related operations, it has also generated a by-product that has proven to be of exceptional value: data. However, to be of true value in aircraft asset management, that data needs to be both accurately and efficiently obtained and, of even greater importance, it needs to be 'understood.'

Today, effective aircraft asset management has become a 'data-driven' process, and here at AAM, we understand this more than most. As a result, through the creation of a highly experienced team of professionals, we have developed innovative, complete, and cost-effective solutions for the numerous challenges faced in the area of aircraft asset management, whether for an aircraft or an engine. Put simply, at AAM, we have a multidisciplinary team of highly respected, knowledgeable, and appropriately licensed consultants who can help you with every aspect of aircraft asset management from initial acquisition through to final disposition.

MESSAGE FROM THE CEO

Being an Aeronautical Engineer is genuinely fulfilling and a privilege. One must work diligently to acquire high levels of skill and knowledge, eventually imparting years of accumulated wisdom and technical expertise to both clients and the next generation of enthusiastic students. As a staunch advocate for paperless digital sustainability, I am leading the charge in developing the next generation of a lifecycle digital records platform to facilitate the digital transformation of our commercial aviation industry customers. Collaborating with our consultants, we are reshaping commercial aviation through our collective expertise, offering future-proof, cost-effective digital solutions.

TEARDOWN SERVICES

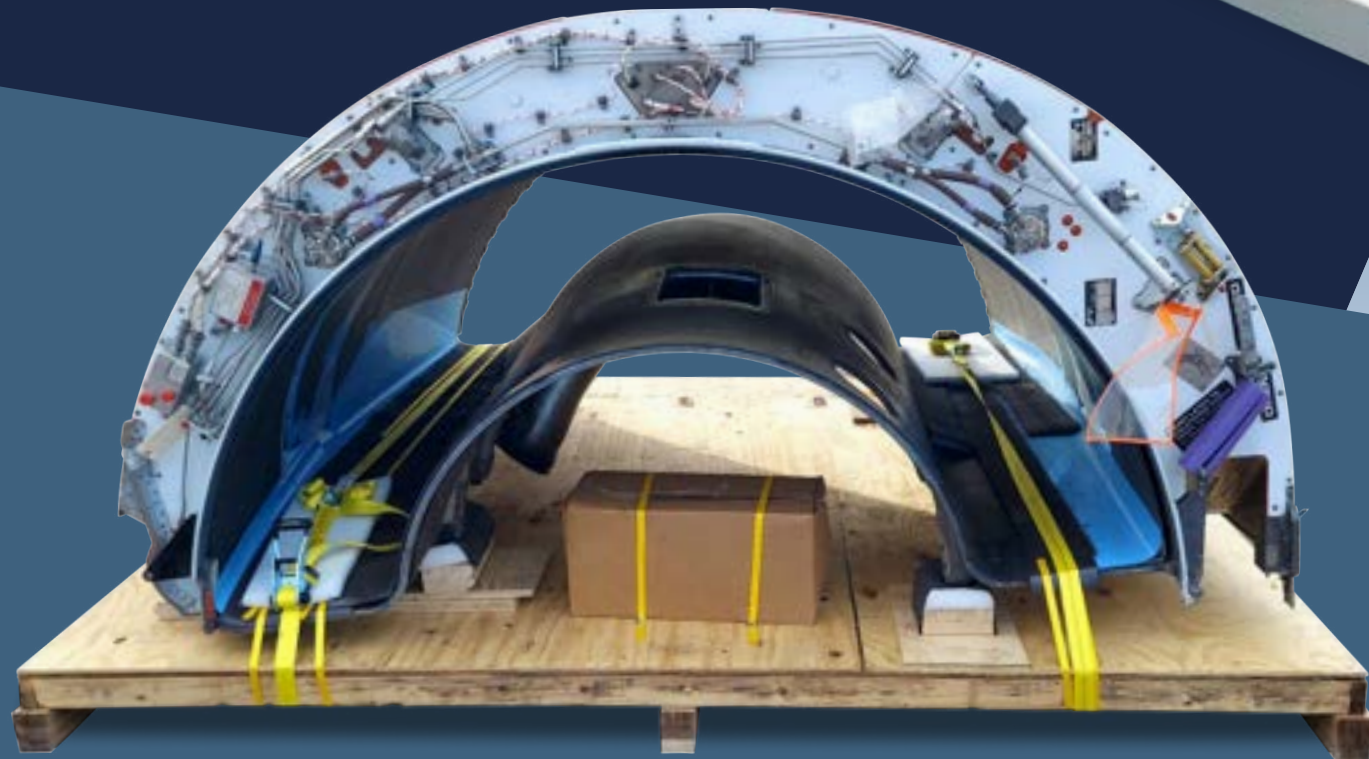

Our company offers specialized Project Management Services for aviation teardown operations, ensuring seamless execution and maximized value extraction. With an on-site presence throughout the project, we oversee the meticulous teardown of diverse components, including engines, avionics equipment, and high-value parts. Our expertise encompasses tracking documentation, status monitoring of harvested components, and coordinating daily production meetings.

Furthermore, we excel in offsite record management, meticulously curating labels for shipped parts. Leveraging comprehensive airframe and engine procurement management, we optimize lead times, costs, and component value. Our tailored approach guarantees efficient teardowns and strategic market offers for optimized returns.

PART PROCUREMENT SERVICES

24/7 Aircraft Support Collaboration: AAM and Cypress Air have joined forces to meet the high demand for aircraft part procurement. Now, you can easily submit part requests through our Aircraft Part Procurement page, seamlessly connecting with our dedicated procurement team.

TRUST AAM FOR SOLUTIONS TAILORED TO YOUR AIRCRAFT NEEDS.

- ✈️ **Expertise and Experience:** AAM, in partnership with Cypress Air, boasts a team of seasoned aviation professionals with extensive industry experience. Our experts possess deep insights into the marketplace, including pricing trends, part availability, and supplier networks. This expertise ensures efficient sourcing of competitively priced parts without compromising on quality or reliability.
- ✈️ **Market Analysis and Negotiation:** Our team conducts comprehensive market analysis to identify optimal pricing opportunities for aircraft parts. We negotiate with suppliers on behalf of our clients, leveraging our industry relationships and bargaining power to secure competitive prices.
- ✈️ **Time and Resources:** Procuring aircraft parts demands significant time and resources, from research and supplier communication to logistics coordination. AAM handles these tasks diligently, saving clients valuable time and allowing them to focus on core operations.
- ✈️ **Quality Assurance:** Maintaining the quality and authenticity of aircraft parts is critical in aviation. AAM conducts rigorous quality checks and verification processes to ensure that obtained parts meet industry standards and regulatory requirements, minimizing the risk of operational disruptions and safety issues.
- ✈️ **Value-added Services:** Beyond procurement, AAM offers value-added benefits such as inventory management, warranty support, and after-sales assistance. Our holistic approach aims to enhance the efficiency and reliability of clients' aircraft operations, delivering long-term value beyond the initial procurement process.
