MAINTENANCE RESERVES MANAGEMENT TRAINING CERTIFICATION PROGRAM

Instructors

Gordon Jarratt - Senior Vice President at AAM

Gordon Jarratt is a highly qualified Aircraft Licensed Maintenance Engineer, with 30 years of experience in the aviation industry. His key qualifications are in Aeronautical Engineering, specialized EASA AML Aircraft Maintenance License and FAA A&P Airframe and Powerplant License. Gordon also has extensive experience in Structure Repairs, Aircraft Leasing, and Project Management of Aircraft Transitions, with a proven track record of consistent revenue growth, effective team mentorship and relationship management. Through AAM, Gordon wants to share his technical knowledge with everyone. It is rare to find such an experienced engineer who is also passionate about teaching. Gordon is very much the exception, and he is able to seamlessly blend the two, subsequently providing both clients and students alike with the full benefit of his considerable expertise and infectious enthusiasm.

Miraj Shah - Vice President at AAM

Miraj Shah is a qualified Aeronautical Engineer, with more than 12 years of experience in the aviation industry. He has extensive knowledge of aircraft leasing, project management, and training. His experience includes technology outsourcing, software development, quality control, business analysis, and general project management. Miraj believes everyone can do two things with knowledge. Use it or share it. He prefers to do both!

Mahima Sharma - Training & Induction Manager at AAM

Mahima Sharma comes from an Aircraft Maintenance Engineering background with more than seven years of experience in the aviation industry. She has invaluable experience in successful aircraft lease transition projects, CAMO and quality control fields. Mahima also specializes in organizational coaching and technical training. Her professional career has been geared towards providing successful professional education and her professional interests include management communication, training development programs, conflict resolution, and leadership.

Other Certificated AAM Programs

AAM is a hub for professional expertise in the aircraft asset management sector. To address gaps in relevant knowledge and skills within the workforce of this sector, AAM has created a series of approved training courses, presented in a flexible learning format, giving aviation professionals a much-deserved opportunity to up skill. The design of all AAM courses is based on Training Need Analysis (TNA) and expertise. Students will learn through live interactive sessions, case studies, and assignments.
